DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by DeLorme (6,321,158).

As per claim 1, DeLorme discloses:

- a display (figures 1a and 1a1);
- a data terminal connected to the display for processing data based on a program (figures 1a and 1a1);
- a navigation system for determining a position of the data terminal and a position of a destination (column 8 and column 38, lines 65-68);
- a transceiver for receiving event data from a remote event data server through a communication system (column 8, lines 35-45);
- wherein the data terminal associates the event data from the event data server with position information from the navigation system and retrieves event information based on a search method specified by a user to display the retrieved event information on the display (abstract).

Art Unit: 3661

As per claim 2, DeLorme discloses how to achieve wireless communication therebetween, thereby receiving the event data from the event data server in real time (column 1, lines 53-68).

As per claim 3, DeLorme discloses the transceiver is an Internet receiver connected to a communication cable of the communication system to receive the event data through Internet and stores the event data in a memory device and processes the event data in combination with the position information (column 8).

As per claims 4 and 6, wherein the transceiver, the data terminal, and the navigation system are incorporated in a portable navigation system, thereby enabling the navigation system to receive the event data from the remote event data server and to search and display the event information in connection with the position information (column 8 and figure 1a3).

As per claim 5, DeLorme discloses the transceiver, the data terminal and the navigation system are implemented as a vehicle navigation system, thereby enabling the vehicle navigation system to receive the event data from the remote event data server and to search and display the event information in connection with the position information on vehicle current position and the destination (column 9, lines 25-35, column 13, lines 40-45, abstract, figures 1a, 1a1, 1a2, 1a3, and 1a5)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3661

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over DeLorme (6,321,158) in view of Cao et al (6,446,004).

As per claim 7, DeLorme does not teach how to interrelates the movie data with the position information and retrieves movie information by a search specified by the user and displays the information. However, Cao teaches it in column 2, lines 33-45. therefore, it would have been obvious to one of ordinary skill in the art to combine the aforementioned references in order to be more convenient to the user.

Claim Objections

5. Claim 14 is objected to because of the following informalities: minor grammatical error. Appropriate correction is required.

Allowable Subject Matter

6. Claims 12, 13, 15-18 are allowed.
7. Claims 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
